Meteorologist's View

Note increasingly cold temperatures and chill effect through the day.

Recent rainfall: measured at Cat & Fiddle: altitude 511m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
03:00 on Wed 02 Dec 2020	0.4mm	9.2mm	9.6mm

Forecast for Thursday 03 Dec 2020

Weather: A few wintry showers continue through the early hours with some clear spells. Then a bright start but becoming cloudier through the morning with sleet and snow developing, falling increasingly as rain below about 450m. The precipitation becomes more persistent through the afternoon, and perhaps occasionally heavy in the evening.

Maximum wind: Southwesterly 20-25mph, gusts around 35mph over summits, overnight gradually become more northeasterly and ease through the day.

Chance of cloud free mountain/hill tops above 600m: Around 60% at first with occasional cloud above 600m, but falling to near zero by late morning with periods or persistent cloud above 450m and patches below.

Visibility: Very good or excellent falling to one or two kilometres in sleet and snow and perhaps a few hundred metres in any heavier evening snow.

Temperature: **Valleys:** Plus 1 or 2 Celsius at dawn rising to plus 4 or 5 Celsius by day.
At 600m: Zero Celsius falling to minus 2 Celsius
Freezing level: 600m falling to 450m
